

Town Voters Elect Three Councillors

Monday was election day in Gleichen for three councillors and resulted in the election of E. Bolinger, R. A. Wilson and Stuart Hampton. The first two will serve on the council for three years and the latter two years.

This was the first election for councillors for many years and prior to voting caused much speculation as to who would be likely to be elected. There were 120 votes cast and none were spoilt. The voting resulted as follows:

R. A. Wilson, 101.
E. Bolinger, 85.
S. Hampton, 51.
G. Bogtie, 46.
B. Biber, 37.
N. Anderson, 36.

The town council will now consist of Mayor H. Colpoys and Councillors M. Murray, R. A. Wilson, P. Michael, S. Hampton, E. Bolinger, and R. Hunter.

Mayor H. Colpoys Letter to Citizens

To the Citizens of Gleichen.

It is an honor, a privilege, and a responsibility for any man to be asked to accept the Office of Mayor of the Town, in which he lives. For the honor I would thank you, for the privilege of serving you I would also thank you; the responsibility is a challenge; I have accepted the challenge only after considerable thought. I shall not be content, unless, at the conclusion of my term, the efforts of our Council and myself shall have contributed in no small degree to further the progress of our town and the happiness of our citizens.

If it is town business and you want to discuss it, call at the Town Office or on a councillor, or on me; we want to know all about things, which have been overlooked; we want to give fair consideration and take proper action with respect to all business, which should have the attention of the Council.

HARRY T. COLPOYS, Mayor.

The Census

As in previous census, the Ninth Decennial Census is being held in this year which will require as to the number at school and the years spent a school of each person in the population. The resultant tabulations will indicate whether or not the average number of years at school have risen since the last census. What changes have occurred in this respect as between urban and rural areas. While it will not include a question on literacy, the figures for years of schooling will afford a fair indication of the number functionally illiterate.

Approximately ten years were being spent in school by the average Canadian child at the time of the 1941 census. While the organization differs from province to province, this would mean that the average child would complete the intermediate grades or be enrolled in high school for about a year. This was more schooling than recorded at any previous census and reflected a trend, shown in each succeeding census, towards fewer drops out in the lower grades and an increase in the number who bridge the gap between elementary and high school grades.

The 1941 census also showed that the percentage of urban children attending school was greater than the percentage of rural children at school, and that 59 per cent of the urban population as against 21 per cent of the rural population had had nine or more years of schooling.

One reason for the difference between rural and urban enrolments is that many pupils in rural areas must leave their homes to attend high school or else take correspondence courses, whereas pupils in the urban areas can attend school while staying at home and may also select on academic, commercial, technical or composite school to attend. In many cities, junior, high schools help them bridge the gap between elementary and secondary school.

A second reason is found in the

greater need for the farm child's services at home and the ease with which rural boys and girls may change from helping at home while attending school to just helping at home. Job requirements in the cities put more of a premium on years of school completed. There is a trend towards providing more facilities for technical education in towns and cities. Rural high schools also provide practical training in agriculture and home economics for farm boys who formerly learned these mostly at home.

Census figures on the numbers not attending school, broken down for rural and urban areas, present the converse to the figures of school enrolment and years of schooling. For 1941 these show that eight per cent of children seven to nine years of age were not attending school in rural areas as against four per cent in urban areas; eight per cent of rural and three per cent of urban children ten to 14 years old; and 12 and 58 per cent respectively of those to 19 years of age.

For people in cities of 30,000 and over a average number of years of schooling in 1941 was greater than for those in centres of 5,000 to 29,999 population. In the larger centres 42 per cent of the population had attended school for nine or more years as against 37 per cent in centres of 5,000 to 10,000, and 34 per cent in urban areas of less than 5,000.

"They"

Hardly a conversation lasting more than a few minutes in our town is complete without some reference to "they." "They" should be defined, or the other thing to improve the community.

This is a situation that is by no means confined to our town. It is common throughout the province and he nation.

Just who "they" are, we are not sure. We suspect, however, that governments—municipal, provincial or federal—are involved somehow. Can taking the attitude that "they" should be responsible for everything we shuffe off any feeling that we personally are responsible in any way to see to it that things are accomplished.

In our town we hear such questions as: Why don't "they" bring in some attention to town? Why don't "they" keep the streets clean? Why don't "they" do something about the cost of living, the housing situation, the snow covered roads, the appearance of the town? Why don't "they" have more sidewalks, provide better street lighting, develop sports among the young people organize a drama society? The list could go on and on.

This "they" business we believe, is a result of the "we" attitude that is prevalent all over the country.

Isn't it about time we realized that we are "they"? We should say "we" and then go ahead and get things done.

Nothing is impossible if "we" really want it and go after it. How? By thinking and planning and working to get it, by putting our best effort into any project we want carried out.

What our town and indeed all Canada needs is more "we"—a lot more—and less "they."

James Stewart of Brandon, Man., is visiting friends in the district after an absence of 28 years. At present Mr. Stewart is the guest of W. Somerville in Cluny. James resided in Cluny for several years and about the same length of time in Gleichen where he worked in the John Ramsay store. He opened the first store in Arrowwood which occupied a site about where the school now stands. He sold it and moved to Brandon where he went farming. He is enroute home after spending some time in California visiting relatives.

It is n't the buildings or the streets or the industries that make a town. It is the people.

"Please" and "thank you" are not outmoded expressions as one might suppose, so seldom are they heard these days. They should be cultivated. Their use takes little time or energy but adds much to the graciousness of daily living.

Long years spent in school are worth little unless, during the educational process, young people learn to reason, to think for themselves intelligently and sanely.

Libel is written abuse. Slander is oral abuse.

Bantams Win Two Games

The local bantams known as Old Sun Rays played in Calgary winning 3 to 1 and on the 10 o'clock ice won again Monday night by 3-2. The total score for the round was 6 for Gleichen and three for the Calgary club. These boys are now playing off for the provincial championship. Their next opponents will either Staveloy or Taber depending on which team cleans up the other.

Gleichen goals: 1st goal P. Stadel from Hwy Ester, 2nd goal, J. Drunkenchiel from F. Tallon, 3rd goal, F. Stadel.

Old Sun Rays lineup: D. Purcell, C. Stinson, E. Jerry, E. Moss, L. Mudd, D. Brown, R. Bain, R. Wilson, F. M. Tallon, J. Drunkenchiel, A. Galt, W. Hawesler, L. McMaster, J. Stadel.

Referees: Service and Barabash.

Playing in Calgary Saturday night the local Midget Hockey Club lost to the Mount Club by a score of 5 to 4. Thus the Hillhurst club has a one goal lead for the next game which will be played in Gleichen on Friday evening starting at 8 o'clock. The second game was originally scheduled to be played here last night but the local team had nine players ill in bed with colds. So the management asked for a postponement of the game. By Friday it is hoped the boys will be kicking up their heels and rarin' to go.

CARD OF THANKS

We wish to thank our many kind friends who patronized and donated to our annual Burns Night Supper.

LAIRDS CURLING CLUB

HERE AND THERE

Born to Mr. and Mrs. Geo. Walker a girl, on February 16th.

Mrs. A. N. McLeay spent Sunday in Calgary visiting relatives and friends. Mr. and Mrs. Albert Riddell of Calgary spent the weekend in town visiting his parents Mr. and Mrs. N. A. Riddell.

J. W. (Bill) Phyllan returned home last week after spending many months in the Belcher hospital recovering from an illness.

Mrs. R. A. Wilson spent several days in Calgary last week visiting friends.

Mrs. M. Holt is at present confined to the Holy Cross hospital having had a serious operation on Monday.

W. A. Walter of Hanaar, who has been visiting Mrs. F. Walter left last week for Portland.

R. S. McQueen has bought a residence in Victoria and is thinking of moving his family there. For the past few years Mr. and Mrs. McQueen have been living in Calgary.

Civil Defence

The Provincial Department of Education is preparing Civil Defence literature for distribution to every school in the province.

Dr. Swift advised teachers will be instructed in proper procedure in case of an air attack. He said there were two reasons for stressing the role played by schools in civil defence—first is to ensure the safety of teachers and students—the second is to provide re-assurance to parents. If our parents know that their children are being looked after, he can conduct his own particular defence job calmly and efficiently, without worry or panic.

"We are proceeding cautiously, but thoroughly not wanting to rush into emergency precautions without necessity."

Dr. Swift explained air raid drill is designed to train children to seek the safest place within the school itself. He compared this to fire drill which is designed to evacuate the building as quickly as possible. All children in the province should know the principles of self-protection and mutual aid. The city children are given more of this training than those in the country.

Serious consideration is being given (Continued on last page.)

Board of Trade Elect Officers Next Meeting

The Board of Trade will hold a regular meeting in the Community Hall on Thursday evening, March 8th, for the election of officers and such other business that may come before it.

This meeting will start at 7 o'clock sharp and must be over by 8:30. At 8:30 the Trans Canada Air Lines will show a picture lasting one hour. There will be a speaker with the films. The show is open to the public and all are cordially invited to attend.

Challenge to Alberta

Throughout the 37 year old history of the Canadian Red Cross Society in Alberta, the people of the province have met many challenges, and not been found wanting. During the First World War, during the depression of '30's, during the Second World War and up to the present time, Albertans have shown that they are Red Cross workers. No ideal has been too high reaching for them at attain.

Because of the work it does, Red Cross must continue. It is Red Cross that gives Albertans free Blood Transfusion Service, Junior Red Cross, Disaster Relief, Outpost Hospitals, Veterans Aid, Swimming and Water Safety and care to their crippled children.

This work must be continued for the future. No one knows when disaster will strike, when illness will require bottles of blood and plasma, when the babe in your home will need orthopedic care beyond your finances.

This year the Red Cross is asking Albertans to contribute \$400,000 to continue its magnificent work. Red Cross is planning to send in Alberta three years, a total of nearly \$600,000.

The care of crippled children looms foremost in the minds of Alberta people at present for it is this year on March 8 that Alberta's Red Cross Crippled Children's Hospital will formally open its doors. Its support is up to Albertans, for while it is true that the hospital is necessary it is equally true that we must not fall in helping pay its running expenses.

There is no more worthy work than that of the Red Cross. When you contribute to its yearly campaign, you are merely paying a premium to ensure that the "work of mercy never ends."

Those who have to learn the English language find many strange uses for the same word. Take the word "fast" for instance. It is most commonly used to denote speed, so that "you have a fast car." Its travels quickly or speedily, but on a fast you tie it to a wharf so that it cannot go. If you go on a fast you refrain from eating. A fast color is one that will not fade. A fast woman is one who is not in the social register. A fast clock is one that gets ahead, but a fast friend is one who sticks by you.

"I have it
right here"

You expect efficient service from your neighborhood bank... and you get it because banks compete with each other to serve you.

The men and women on your bank's staff strive to excel in banking skill, friendliness and courtesy. Just as you strive in your own work.

Your regular dealings with your bank are confidential, intimate, helpful. And you can rely on your bank manager's wide sources of information to help you in your business or personal financial problems.

You may go free to shop around among banks. That's what keeps them competitive.

See your oil burner equipment dealer for installation and service. Contact your nearest Imperial Oil Office or Agent for your supply of dependable, economical Esso Heating Oil.

THE SIGN THAT SAYS MORE FOR YOUR MONEY

Shortage Of Teachers

A RECENT SURVEY conducted by the Canadian Education Association has revealed that there is a serious shortage of teachers in rural schools in all parts of Canada. In recent years there has not been a sufficient supply of trained workers in many of the trades and professions due to increased demands for more food and services and this situation has caused inconvenience and in some cases hardship in many communities. The shortage of teachers has been serious, especially in rural areas. The larger centres, where salary scales are usually higher and the schools larger and better equipped, tend to draw teachers from the country districts and unless newly-trained teachers are available in sufficient numbers, positions in rural schools remain vacant.

The report issued by the Canadian Education Association showed that nearly 200 one-room rural schools in Canada are now closed because there are no teachers for them. In addition, 3,900 rural schools had teachers who were not fully qualified. In all, the report listed the shortage of teachers throughout Canada at 5,650, classing schools without qualified teachers as vacant. The report also showed that there are 8,000 students taking teacher-training courses in Canada this year. Last year there were 10,071, or 20 per cent. more than in the present year. The fact that the general labor shortage makes it possible for people who might otherwise be teachers to earn more money in business or industry, no doubt accounts, to a great extent, for the lack of teachers at this time.

Is Important To Community

Alberta, which pays its rural teachers the highest median salary of any province in Canada is the least handicapped for well qualified teachers. The median salary there is \$2,181 per year, and the median salary in 1930 was \$1,600. The greatest need for teachers is in Newfoundland, where the shortage was estimated to be 1,330. No salary scales were available for that province. The school is an important part of every community and it is regrettable that so many rural schools in Canada should be closed at this time. The educational needs of children in rural areas does not differ from those in other places and every effort should be made to bring an early end to the present shortage of teachers in Canada.

BLIND MARSHMAN—Bill Allard, of Bull Gardens, Cal., who lost his eyesight in a hunting accident 10 years ago, has developed an uncommon sense of hearing and can shoot a bird off a 120 foot away, he says. He is now aiming at him in trouble. Parents of two boys said he aimed his slingshot at them, hitting the mark. He charged the youths annoyed him.

Predicts Cut In Gasoline Price

LETHBRIDGE, Alta. — A third large oil tanker will be constructed on the Great Lakes to transport Alberta crude oil to eastern Canadian refineries. P. J. Stubbs of Edmonton, oil, assistant general manager of Interprovincial Pipe Line company, announced here.

He also announced that storage tanks capable of holding an additional 2,600,000 barrels of crude will be constructed at both ends of the 1,127-mile Edmonton-Superior, Wis., pipeline. The extra tanks and the third tanker would be built in 1931-32.

Mr. Stubbs predicted further price reductions on gasoline this spring on the prairie as a result of the pipeline. By next November the market for Alberta crude will be 130,000 barrels daily, he added.

Funny and Otherwise

A party in Switzerland decided to second a very small peak in the neighbourhood of their hotel. Though the climb was no more than a strenuous walk, a guide was engaged, and when the party assembled it was noticed that one of them carried a totally unnecessary rope.

The guide, nodding gravely to the rope, inquired politely: "Miser! Is going to keep—yes?"

A five-year-old boy had been having trouble at the hands of a small school-fellow. One day, on his return from school, he remarked to his mother, "Johnny isn't nasty to me any more; every time I see him, I hit him to keep him from."

At a birthday party a young lady began singing "The autumn days have come, ten thousand leaves are falling." She started on too high a pitch — "screamed and stopped at ten thousand."

At a auctioneer who was present exclaimed, "Try starting her at five thousand!"

1st Tenant: "The wretchedest says that the woman who just moved into that apartment on the third floor is a lesbian."

2nd Tenant: "My, my—and she looks just like a Canadian, doesn't she?"

"Eric loved a girl called Emma. A month ago he called her 'darling', three weeks ago he was calling her 'dear', and two weeks ago he was calling her 'Emma'."

"What does he say now?" "Maud!"

A small boy, visiting New York for the first time, went in a lift to the top of a skyscraper. As he shot past the 22nd floor at breath-taking speed, he slipped, turned to his father, and asked, "Daddy, does God know we're coming?"

A film star arrived at a friend's house to spend a holiday. He drove up in a very dilapidated car with shabby side curtains and flapping mudguards. Staring down at the wreck, the host barked, "What in the world is that?"

"Oh," the star replied loftily, "this is my town car."

"What town?" demanded his outraged host. "Pompeii!"

They were discussing a certain undetectable and irrefragable politician.

"Well," summed up the smokescreen philosopher, "I'll tell you this about him. He might have typhoid and recovery; he might have pneumonia, and recovery; he might have cerebral meningitis, and recovery; he might have yellow fever, and recovery; but—if he ever had lockjaw, by god, he'd be a bore!"

Expedition Brins Back Rock Containing Uranium Oxide And Copper From Northern Sask.

SASKATOON. — Stored in protectively lead-lined pullock boxes in a vault in downtown Saskatoon are pieces of rock, heavy with uranium oxide and rich in showings of copper. Some of these were brought back just before Christmas by live Saskatoon men who found them north of Camrose Portage, in the extreme northwest of Saskatchewan.

To get them, they motored 250 miles from Saskatoon to the settlement of Lac la Ronge, then some 500 miles north and west to the north shore of Lake Athabasca, north of the 56th parallel, to land at Camrose Portage.

The expedition was part of Saskatchewan's hunt for uranium. The five men were Henry Wright, managing director, and Ford Beavis, director of Great West Uranium Mines Ltd.; Douglas Beavis, his brother, all of Saskatoon; George Herberberger of nearby Mildred, and Don Worden, Saskatoon newspaper man who, familiar with the development of Kirkland Lake gold and cobalt silver in Ontario, wanted to see the lay of the uranium country.

The prospecting group is conducting exploration and development work on a concession of 25 square miles some 10 or 12 miles north of Camrose Portage.

It is part of a larger area, 220 miles wide by about 70 miles deep, which is the centre of Saskatchewan's uranium hunt. In the north-west, it adjoins the Northwest Territories; its southern limit is the 56th parallel.

There are more than 30 active mining operations, ranging from exploration to development. The first announced, is the scene of the recently announced John Nesbitt discovery. Headquarters of the scattered camps and lonely tents of that grim land of rock, lake, forest, and caribou pasture is Goldfield. This is the

town boomed in the days of the Box mine, whose wide vein of ore made gold pay at \$3 a ton. Before it closed in the early '40s, Box mined 2,000 tons a day and made gold bricks in its own refinery.

The Box mine's power plant today supplies several uranium operations and, with installation of a new turbine, can be loaded there on Northern Navigation Company barges and taken to Waterways, 300 miles southwest, across Lake Athabasca, where there is a railroad.

Native trappers, turned prospectors, now are as familiar with the Geiger counter, the gadget which buzzes in the presence of radioactive ore, as they are with dogged, rifle and trap line.

The prospecting trenches run 15 feet deep and more. They are filled with rock shattered by dynamite blasts. Parts of them have a smudgy, rusty color. That is uranium oxide. There is also a glittering yellow, that's copper.

REGINA HOLDING SPRING BONSPIEL

REGINA. — Officials of the Regina Curling club announced that a spring bonspiel will be staged the week of March 27 on their artificial ice.

There will be four events with draws at 6, 8 and 10 o'clock every evening. It is open to all rinks in the province.

Earl Bourne was appointed chairman of the 'spiel.

Plan To Carry On Road Work In Park

PRINCE ALBERT, Sask. — James Smart, director of national parks, said that prospects are good that the 30 miles of highway from the Prince Albert national park gate to Waskesiu road, in the park will be hard-surfaced this summer.

"Unless unforeseen circumstances arise, we shall carry on with this work in the spring," said Mr. Smart, who visited here.

Zine accidentally was discovered by a German alchemist in the sixteenth century.

GOOD SEED for BETTER CROPS

Grain is not seed unless it is clean. You can be sure your own grain is seed by careful cleaning with your own machinery or through a well equipped, properly operated seed cleaning plant. If you are buying seed accept nothing that is not graded.

Good seed, like good livestock, should have a pedigree behind it. If you do not plan to use registered seed for the whole farm you should at least use seed that has registered seed in its ancestry. You can do this by buying seed grown from registered seed, but the best method is to buy a few bushels each year and have a seed plot on your own farm where you can keep it pure.

It is good business to use registered seed of all grains, but for MALTING BARLEY, pure varieties are a "must". Get your seed now while stocks are available. Registered Montclair and Oil Barley are available in sealed sacks from your elevator agent and from seed handling organizations.

DODGE

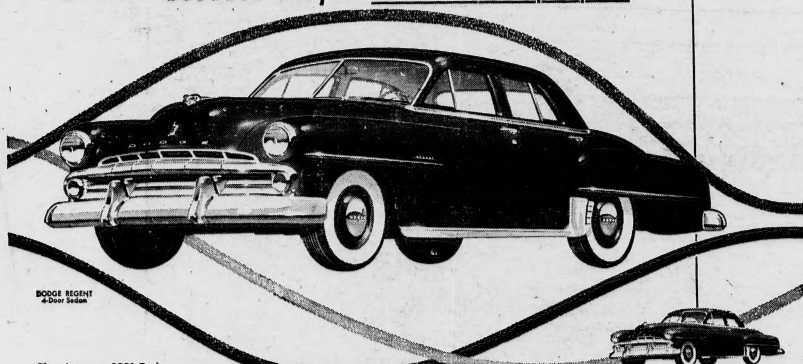

the choice for 1951

The moment you open the door of an all-new 1951 Dodge, you'll realize that these stylish new cars set a new high in comfort and safety in their price class. The big, wide-opening doors let you get in and out without crouching or twisting. Interiors are designed to let you relax—with plenty of head, leg and shoulder room. You sit on chair-height seats with a broad, safe view of the road through the new, wider windshield and rear window. The rigid steel body, finger-tip steering and "balanced" four-wheel brakes let you drive confidently—in safety.

Your Dodge dealer invites you to drive any of these great new Dodge cars... to test their comfort, smoothness and safety in traffic and on the highway. Let performance convince you.

because they're built around people!

DODGE REGENT
4-door sedan

There's a new 1951 Dodge that's right for you, regardless of price level

In the low-price class there are the Dodge Kingsway 3-passenger coupe and 2-door sedan models. Slightly higher in price are the longer-wheelbase Dodge Crusader and Regent models, club coupes and 4-door sedans. For town and country use, and special commercial purposes, Dodge also offers the all-metal Suburban and the New Savoy. The first Dodge is the luxurious Dodge Coronet, the lowest-priced car with Fluid Drive—now available with Gyro-Matic transmission as optional equipment. The Dodge Coronet (not illustrated) is available as a club coupe, 4-door sedan and 6-passenger sedan.

CENTRAL MOTORS

Town & District

A fair sized crowd turned out to see the performance given by the Strathmore skaters last Thursday evening. The event was staged by the local Athletic Club.

John Guttrath has returned home from Belvoir hospital in Calgary where he underwent an operation on his leg that was badly torn by shell fire in France during the last war. He had been in the hospital the past several months.

The Meadowbrook Hall committee are sponsoring a concert and dance on the evening of March 16th. The concert is in charge of the Sons of the South and Basano Royal Orchestra will supply the music for the dance.

The members of the Gleichen Legion held their annual bazaar last Friday at the curling rink. There were nine rinks entered. The skippers were H. Bogate, Prassard of Cluny, W. Morrison, G. Souter, Cam Evans, Cam Brown, C. Kilcup, A. Quennell, B. Bahr, Cam Evans rink won the trophy and Prassard's rink second.

Bill Walters has been confined to his home for the past week with an infected face. He had his face injured when playing hockey against the Vulcan team a short time ago. He is one of the star performers on the midwest hockey team and hopes to be recovered sufficiently to play next Friday when the Midgits meet the Calgary team in the final game.

Wm. Cookson who has been living at Eventide Home for the past eight years died early Sunday. He was born in England and had lived in Canada for the past 43 years coming to Gleichen from Staveland. Funeral services were conducted Monday afternoon at 2 o'clock by Major A. P. Parkinson of the Salvation Army after which interment was made in Eventide cemetery.

Civil Defence

to the suggestion of including first aid in the school course in order to teach treatment for flash burns, and exposure to radiation,

"Older children will be trained to accept more responsibility. They will be expected to assist teachers in caring for younger pupils to act as messengers, direct traffic and possibly if necessary to study fire-fighting techniques. School cadet corps, scouts, guides and taxis will help provide leadership in the schools."

"No one likes to think of children being exposed to the dangers of all-out warfare. For this reason, every city parent should consider the possibility of evacuating his children to the country. This is certainly a very remote possibility but one which must be given consideration. The department of education would be faced with the problem of continuing the schooling of these evacuated children, no matter where they were moved."

Whether or not parents should remove children from rural schools if an air raid warning is sounded depends on instructions to be received from the civil defence committee at that particular time.

It might be recommended that buses leave at once and take children home from consolidated schools. On the other hand it might be recommended that children remain and seek shelter in the school building itself.

The recommendations for removal of children from city schools is similar to the rural situation. In Britain, parents were not encouraged to remove children because it involved all concerned in needless risks. Parents must train their children to place themselves completely under the teachers' care in the event of an air raid warning. Parents can assist schools in designing a sound defence program by studying civil defence precautions with emphasis on application to the schools. The department of education is co-operating to the fullest extent with the civil defence organization and urges that Alberta school boards, teachers, and parents do their part by assisting their local committees.
